- Residential View

Walls & Windows

- Painted Walls
- Wood Clad Walls

## **Interior**

50 year old narrowboat - very simple interior. Light wood panelling on the ceiling and half of the walls, white painted lower half of the room. Dark wood flooring. Original cast iron stove with chimney and black steel panels surrounding it, hand-made shelving and sink units, alcoves with chopped wood and various power tools. Porthole windows, original scenic door-painting. Interior can be re-designed and re-painted to suit your production's needs. Roof can be walked on - boat also has usable decks at the front and back and an engine cabin with an original BMC 1.8 engine from the 70s.

## **Exterior**

Freshly painted top half of the boat - in white. Happy for production companies to repaint the exterior in any colour or design they like. Deck is in rusting yellow, blue and red. Large black flat roof which can be walked on, including a holder for a parasol.. Two decks - one at the back which is used for steering, containing a brass and blue tiller and original red gear lever box. Bottom panels can be lifted to reveal the engine bay and engine from the 1970s. Front deck is shield shaped and painted red. Bottom of boat is painted black but is rusting and flaking in places. Tyre and rubber fenders. Different types of ropes tied at the front and back.

Boat can be moved to any available space on the London canal network - which gives you options from the rural natural park of Lea Valley to Camden. Miles of canals across London, criss-crossing the city, taking in bridges, locks, residential and commercial areas. Canal paths are normally accessible next to the boat.. Boat can be moved to elsewhere in the UK if a desired location is preferred subject to an additional payment for fuel and time to move it. Boat is 11m long, with a 2 metre width, and 6 foot height inside the cabin. 2.5m of deck-space at the back, 1.5m of deck-space at the front.
