Interior

We have had several people film TV commercials, documentaries, etc. on-site and interested in repeating the positive experiences these brought the yard.Functioning Steam Train Repair YardWe have a fully operational mainline steam-train repair yard complete with every piece of heavy-machinery you can imagine.We are constantly in the process of repairing and assembling steam locomotives of various ages.Station BuildingsThere is a short platform, a live 1920â€™s era Signal Box, a working turntable, etc. We even have a â€œtop shedâ€ where we hide some of our steam collection that is yet to be restored.Perfect for a Railway Children type discovery!Steam EnginesWe also have many fully operational engines, including GWR Castle Class 5043 â€œEarl of Mount Edgcumbeâ€, GWR Hall Class 4965 â€œRood Ashton Hallâ€, GWR Pannier 9600 (in black), and an Ex-GWR Pannier L94 (7752) in crimson London transport livery.There are also a series of guest engines that â€œliveâ€ here including LMS 6201 â€œPrincess Elizabethâ€.CoachesWe have available a selection of 1950â€™s era coaches. We have a Corridor First (FK), a First Open (FO) that used to be part of the Royal Train MANY years ago, 3 Pullman Dining coaches and several Standard Class (TSO).All our coaches are painted in GWR (Chocolate and Cream).Availability for FilmingWe are primarily in the business of running Steam-hauled day excursions on the mainline throughout the UK. This would allow filming to take place during the week-days without the interruption of moving trains.Further images are available on request.
