Interior

This is one of two studios available, either separately or together, the other can found with LON7203. This Studio is filled with natural light as it has many large original period windows. It is split across two levels with a mezzanine balcony where you will find the kitchenette, as well as a bedroom and vanity space on the upstairs landing space. Downstairs you enter into a large entrance hall with minimal furniture. From here you can go upstairs to the above mentioned spaces or through the tulle curtains to the lovely living space with neutral but sleek and modern furnishings. A curved boucle sofa and lime wash walls complete this space. It can hold up to 15 crew members,

Exterior

The exterior is a stunning Victorian building that was once a school and now converted into apartments and studios. There is onsite parking available for up to five cars.
