Immersive VR Exhibition For Filming

London VR venue available for filming and video shoots

Location: North West London, London, United Kingdom

Within the M25: Yes

Categories:

Features:

Interior

A large, open-plan filming space with striking, geometric floor and wall graphics designed to support VR tracking systems. The bold, colourful patterns and industrial ceilings give the space a futuristic, digital feel — ideal for sci-fi concepts, virtual worlds, music video choreography, brand shoots, and set builds. A contemporary entrance lounge with clean lines, ambient LED lighting, and a white illuminated counter/bar. This area is well-suited for smaller scenes, behind-the-scenes footage, or as a green room/production base during filming.
