Interior

- the building is a heavy steel frame supporting a steel trussed roof
- it is divided into two bays, both approximately 20 metres wide (17k sqft each).
- one bay is 12 metres high to the eaves and bay 2 is 9 metres to the eaves
- Usable space in the two bays is 3,220sq.m with a line of 8 columns running up the middle
- Roller shutter large enough for articulated lorries to access
- 3-phase electrical supply rated at 500A per phase
- No water supply but hydrants can provide a temporary supply
- No toilets so portable toilets would be required
- Mercury vapour lights cover the main area of the building and are 400W each.
- Blackout option available (with notice)
- Parking available for large vehicles on site and nearby
- Can be used as a film location or unit base
