- Large Windows
- Painted Walls

- Skylights
- Wood Clad Walls

Interior

The barn is an ongoing project. The inside is a beautiful rustic uncleaned oak frame. The barn has building materials inside and work has started to insulate the outer walls from the inside. It would be a possibility to move materials if necessary. There is a toilet and basin and a small utility/kitchen area with hot running water. There is a stable block close to the barn consisting of 5 stables timber clad on the inside.

Exterior

The area has the feel of agricultural/equestrian. The village is a traditional old village with a cricket club village pond and village shop and butchers and surrounded by country lanes.. There is a menage and paddocks and ample parking for many vehicles, there is a small wooded parcel to the end which is currently let could possibly be available. The barn is constructed of an accretive oak frame visible internally and painted weatherboarding externally.
