Interior

This lovely period cafe offers a unique filming opportunity in a venue with original features not often found elsewhere. The raised seating areas at the front have the beautiful rounded glazing as a standout feature.

There is real wood flooring throughout and a bar area with small stained glass windows up in the gantry space.

Throughout there are red leather style seats giving you a diner feel to this cafe.

Through the back, there is a small staff area which is of a different finish as expected in a space like this.

Exterior

Through the back of the property you will find a walled in terrace with seating and lots of sunlight. There is a metal fire escape stair case leading into the space from above.
