Interior

There are four large flexible event venues of varying sizes. The largest is 1250m², which features 12m high ceilings and no internal support pillars. The site has various testing laboratories, garage units that fit double decker buses, offices and commercial buildings. There is also a cafe and a commercial kitchen offering catering services.

Exterior

The secure site is spread over 700 acres and has 70km of private test tracks. These are a mixture motorway style road, country roads and off road terrain. There is large steering pad covering 15km² that be used to build outdoor structures. There is also a fuel station and EV charging onsite.
